- Processor, memory and disk utilization
- Server maintenance savings opportunities
- Server administration savings opportunities
- Hard and soft cost analysis
- Server virtualization design and cost

Time On-site

Approximately 3-5 days, depending on number of clients and geographical diversity.

Description

Where are your IT teams' talents best spent? Most organizations' priorities are to make a larger impact by focusing on revenue-driving application support, customization or compliance efforts.

Let's face it, client management and support is anything but strategic, but it is certainly inevitable. If mismanaged, support can be an expensive liability, undermining your reputation or draining financial resources.

Bell Industries has specialized in client management and support for over 25 years. We understand the points of leverage throughout the lifecycle that can be utilized for cost savings and customer satisfaction. Are you certain that your organization has tweaked every bit of efficiency out of Lifecycle Management?

Our team has the ability to analyze your entire IT lifecycle or components of the lifecycle, including:

- Procurement
- Supply chain management
 - *Receiving*
 - *Imaging*
 - *Warehousing*
 - *Asset management*
- Install, Move, Add, Change (IMAC)
- Tier 1 support (HelpDesk)
- Tier 2 support (Deskside support and maintenance)
- Tier 3 support (Data center management)
- Retirement and cascading of equipment
- Lease refresh

Let the objective professionals at Bell Industries assess your environment to help drive out cost and take the non-strategic work out of your hands. Contact your Bell Industries Account Manager for more details.
