

Wireless LAN Network Assessment

Deliverables

Bell Industries provides consulting services for a wide variety of Wireless Local Area Network (LAN) solutions, offering fast and secure wireless connectivity for internal corporate users, as well as secure yet segregated Internet for guests and non-employee users.

Bell Industries' experienced engineers can help you with:

- Wireless access points
- Secure encrypted connectivity
- Wireless VPN
- Authenticated access
- Segregated protected access
- Policy protected access
- Cost-effective deployment
- Network perimeter lockdown
- Wireless Hot Spots
- Active Directory / LDAP Authorizations
- Network monitoring
- Security alerts

Time On-site

Time on-site will vary depending upon the complexity of the solution.

Description

Wireless Local Area Networks (LANs) offer increased productivity and various cost-saving benefits to the small and medium business space as well as to larger enterprise organizations. Today, wireless LANs are a standard form of communications for mobile users, allowing continuous uninterrupted connections as users move throughout their organization. Wireless LANs also afford the mobile user the opportunity to connect securely and be productive wherever appropriate wireless access points are available.

Bell Industries' Wireless LANs offer a number of hardware, software and security options addressing all of the various connectivity needs of your organization.

During a Bell Industries Wireless LAN Assessment, our wireless team will discuss your requirements and develop a solution offering appropriate wireless LAN connectivity and security solutions, including:

- Various hardware vendors including Cisco, HP ProCurve, Linksys, Netgate, and others
- IEEE Wireless 802.11 a / b / g / and n protocols
- Network site survey and planning diagrams
- Various security, encryption and VPN solutions
- Connectivity monitoring and alerting
- Configuration, provisioning, activations and deployments
- Documentation, Inventories and Reporting

Bell Industries' wireless network team will help your organization define and solve the various issues and concerns surrounding your corporate wireless connectivity requirements. Let Bell Industries show you how Wireless LANs can increase your productivity and save you money. Contact your Bell Industries Account Manager today for more details.
